

**Question:**

I guess I have to inform you that I am preparing the project about person's buttocks (on the human body I mean). If Mr. Yukhnytsya is interested in "legs", he may be as well interested in other parts of body on pictures.

**Answer:**

A very nice question. I was to answer it on the web site and here the opportunity has appeared. The frivolity of the topic itself disposes many painters to different things. That is their right. The aim of our campaign is to stimulate artistic inquisitions and to be able to make the topic the main subject. And because of erotic ostent of the competition to give artists the opportunity to raise to higher spiritual worlds. It means even from seductive topic elicit something noble, worthwhile, beautiful and spiritual. And this, the real aim of the profession of Artist is. But angeling by those chosen, whom paint brush was given, platitudes of lower worlds and disgusting manifestation is the way to past beastly worlds and centuries. And, unambiguously, the personal responsibility of every artist before himself, his family, society, nature and his talent

Thanks to our and other galleries how many nice, noble, dying, educative and practical traditions could be kept! Because of national modern clothes, high themes of the 21<sup>st</sup> century orients on healthy, physical, moral development. How many luxury, balanced, elegant, modern styles will become more popular. How many people on the parting of the ways could be led to self perfection and finally to evolution. That actually is all. I hope many will hear me.

Yevhen Yukhnytsya
